Clifford Ruzica, Principal
Ruzica and Associates
2495 Parallel Dr, Lakeport, CA 95432

Dear Clifford,

You may remember we talked on the phone on April 21 of this year, when I told you I was on the CSA2 Advisory Board, and having difficulty presenting an alternative water-distribution plan to the already-drafted \$1.7 million grant-funded Spring Valley water distribution plan by Scott Harder of Special Districts.

Attached please find a copy of an email to Jim Steele with attached draft of the above-mentioned plan by Jim Moffitt that describes in whole the Special Districts Plan, Jim Moffitt's alternative plan, and some of the difficulties we have had presenting it for consideration.

At the time we spoke, you graciously offered to host a meeting with Special Districts to "Hash out our differences," and said you were a "Local boy familiar with our system," and could use the work.

Jim and I continue believe Jim's plan is vastly superior to Special District's Plan, although in our effort to sell it we are lacking one thing: a recommendation from a consulting engineer. I have recently resigned from the CSA2 board, and this effort is continuing without official backing.

Would you look at these documents briefly at your convenience and call us back to discuss them? We aren't looking for a costs-benefits analysis, or comparison of ROI's, simply a "deserves further study" or "in my experience can't or shouldn't be done for the following reasons," basic interpretation.

Jim and I are prepared to pay you for several hours of your work to read the competing plans and make a recommendation. If you are willing to do this please advise us how many hours of your time you will need. Jim and I are prepared to pay your fee "up front" and look forward to presenting your hours to the board in the future for reimbursement to us. We would also recommend hiring your firm to analyze and/or develop the project if approved.

Thank you for your time and consideration.

Sincerely,

Christopher Musser
